

Hospital Management System

Flowchart Pack — modules 11 to 25

Charts 1–10 (Home, About, Services, Doctors, Contact, Admin Dashboard, Patient Management, Appointment Management, Billing, Doctor Management) already exist in the earlier pack. This document adds the fifteen modules that were missing, taken from the delivered codebase.

#	Flowchart	Implemented in
11	Patient Registration	register.component.ts · AuthController.register
12	Login and JWT Authentication	login.component.ts · AuthService · JwtService
13	Route Guard and Token Interceptor	guards.ts · auth.interceptor.ts · JwtAuthenticationFilter
14	Appointment Booking (Patient)	book.component.ts · AppointmentService.book
15	Slot Generation	AppointmentService.availableSlots
16	Collision Validation	AppointmentService.checkCollisions · EXCLUDE constraints
17	Admin Request Queue	admin-dashboard.component.ts · approve / reject
18	Payment and Receipt	payment.component.ts · MockPaymentService.pay
19	Cancellation and Refund	AppointmentService.cancel · refundNote
20	Patient Profile Self-Service	patient-dashboard.component.ts · AuthService.updateProfile
21	Department Management	CatalogService department CRUD
22	Room Management	CatalogService room CRUD
23	Patient Ward Status	CatalogService.patients · updatePatientStatus
24	Admin Search and Bulk Delete	admin-dashboard filters · deleteMany / deletePatients
25	Validation and Error Handling	GlobalExceptionHandler · readError · PopupService
