

Hospital Management System

User Manual

City Care Hospital, Mumbai · Version 1.0 · July 2026

For patients, front-desk staff and administrators. This manual explains every screen in the portal, the rules the system enforces, and what to do when something is rejected.

Section	Page topic
1	Introduction to the application
2	System requirements
3	User roles
4	Getting started and signing in
5	Visitor guide — browsing doctors and departments
6	Patient guide — register, book, pay, cancel
7	Administrator guide — queue, records, search, ward status
8	Rules the system enforces
9	FAQs and common error messages
10	Contact and support
A	Appendix — process flowcharts

1. Introduction to the application

The City Care Hospital Management System is a web portal that replaces the paper appointment register at the outpatient front desk. Visitors can browse consultants and departments without an account. Registered patients book slots, pay the consultation fee, print receipts and track the status of every request. Administrators approve or reject requests and maintain the doctor, department, room and patient records.

The system refuses to double-book a doctor or a room. That check runs when a patient requests a slot and again when an administrator approves it, so a room reassignment cannot create a clash.

2. System requirements

Item	Requirement
Browser	Chrome, Edge, Firefox or Safari — current or previous version. JavaScript must be enabled.
Screen	Works from 320 px upward. Below 760 px the layout becomes a single column and wide tables scroll sideways.
Network	Access to the portal address supplied by your IT team (by default http://localhost:4200 with the API on port 8080).
Printing	Any printer or a PDF printer for receipts. No plug-in is needed — the receipt uses the browser's own print dialog.
Account	Patients self-register. Administrator and doctor accounts are created by the hospital's IT team.

3. User roles

Role	Can do	Cannot do
Visitor (not signed in)	Browse doctors, specialities, experience, fees and departments; search; view consulting hours.	Book, pay or see any patient record.
Patient	Register, edit own profile, book and cancel appointments, pay, print receipts, view upcoming and past visits.	See other patients' records; approve appointments; edit doctors or rooms.
Administrator	Approve or reject requests, assign rooms, manage doctors, departments, rooms and patients, search, bulk delete, mark admitted or discharged, record cash payments.	Book on a patient's behalf from the patient dashboard.
Doctor	View own appointment schedule.	Approve requests or edit records.

4. Getting started and signing in

Open the portal address in your browser. The home page loads without an account.

- **Home button and logo** — the logo at the far left and the Home button in the navigation bar both return you to the home page from anywhere.
- **Search box** — type a doctor's name, speciality or department and press Enter.
- **Login / Register** — on the right of the navigation bar until you sign in; afterwards you see your name, your own pages and a Logout button.

Screenshot placeholder — home page with the navigation bar

Demo administrator account: admin@hms.local / Admin@123. Change this password before the portal is used with real patients.

5. Visitor guide — browsing doctors and departments

- **Our Specialists** lists every active consultant with speciality, department, qualification, years of experience, fee and consulting hours. The **Book** button beside each doctor starts a booking.
- **Departments** lists each department with its doctor count. **View specialists** filters the doctor table to that department; **Clear filter** restores the full list.
- Clicking **Book** without signing in shows a message and takes you to the login page. After you sign in you are returned to the booking screen.

6. Patient guide

6.1 Registering

Choose **Register** in the navigation bar and complete both sections. Fields marked * are required.

Field	Rule
Email	A valid address, used as your username. One account per address.
Password / Confirm password	8–50 characters with at least one capital letter, one small letter, one digit and one special character. No spaces. Both entries must match.
Full name	Letters, spaces, dots, apostrophes and hyphens only.
Mobile number	Exactly 10 digits starting with 6, 7, 8 or 9. Anything you type that is not a digit is ignored.
Date of birth, gender, blood group, address	Optional; you can add them later from your profile.

Tick **Show passwords** if you want to check what you typed. When you press **Register** the form is checked, a confirmation box appears, the form is cleared and you land on the home page already signed in.

6.2 Your profile

Open **My profile** from the navigation bar. Edit any field and press **Save profile**. Your registered email is shown but cannot be changed here — ask the front desk if it needs to change.

6.3 Booking an appointment

Choose **Book appointment**, or press **Book** beside a doctor.

- Select the doctor. Their department, consulting hours, slot length and fee appear underneath.
- Select the date. The slot list fills in automatically.
- Pick a slot. Slots already taken are marked (*booked*) and cannot be selected; slots in the past are not offered.
- Optionally choose a room. Only rooms free in that slot are listed. Leave it as *no room preference* and the front desk will assign one.

- Add a reason for the visit if you wish, then press **Request appointment**.

Your request is saved as **PENDING**. If somebody booked the same slot a moment before you, the system says so and refreshes the slot list — pick another slot.

6.4 Tracking your appointments

Open **My appointments**. The list is split into **Upcoming** (the visit has not happened yet), **Visited** (the slot has passed) and **All**. Each row shows the status and, if the front desk rejected the request, their remarks.

Status	What it means
PENDING	Waiting for the front desk to confirm. You can still cancel.
APPROVED	Confirmed. A room may also be shown. Arrive 10 minutes early.
REJECTED	The front desk could not accept the request. The reason is in the remarks column.
CANCELLED	Cancelled by you. If you had paid, the refund note is in the remarks column.
COMPLETED	The consultation has been recorded as finished.

6.5 Paying and printing the receipt

Press **Pay** on any unpaid appointment.

- Enter the card holder name, card number, expiry (MM/YY) and CVV. The card number is hidden as soon as you leave the field — only the last four digits stay visible.
- Read the terms and conditions at the bottom of the page and tick **I agree**. The Pay button stays disabled until you do.
- Press **Pay**. On success a receipt appears with a receipt number and a transaction reference.
- Press **Print / save as PDF**. Only the receipt prints — the menu, search box and footer are left out.

What the hospital stores: the last four digits of your card, the holder name and a transaction reference. The full card number and the CVV are never saved.

To see a receipt again later, press **Receipt** on that appointment.

Screenshot placeholder — card form and printed receipt

6.6 Cancelling and refunds

Press **Cancel** on a pending or approved appointment and confirm. The slot is released immediately. If you had already paid, the refund is started at the same moment and the remarks column records the amount, the card it goes back to and the receipt number. Refunds reach the account in five to seven working days. Appointments already marked COMPLETED cannot be cancelled — call the front desk.

7. Administrator guide

Sign in with an administrator account and open **Admin dashboard**. Six tabs run across the top.

7.1 Request queue

- Every PENDING request is listed oldest first, with the patient, doctor, slot and stated reason.
- To confirm: optionally pick a room in the **Assign room** dropdown, then press **Approve**. The overlap check runs again — if the room is taken, the approval is refused and you can pick another.
- To decline: press **Reject** and type the reason. Remarks are mandatory and the patient sees them on their dashboard.

Screenshot placeholder — request queue with approve and reject

7.2 Appointments

- Search by **appointment ID** or **appointment date**; the count under the search bar shows how many rows match.
- **Mark paid** records a counter payment for an unpaid appointment and generates a receipt number.
- Tick rows and press **Delete selected** to remove several at once, or use **Delete** on a single row. Deleting an appointment also removes its payment record.

7.3 Doctors

- Search by **doctor ID**, or by **speciality or department** name.
- Add or edit a doctor: name, speciality, qualification, 10-digit mobile, years of experience (0–70), department, fee, slot length in minutes and consulting hours. The consulting window must be at least as long as one slot.
- **Deactivate** hides a doctor from booking while keeping their appointment history.

7.4 Departments and rooms

- Department names must be 3–80 characters and unique. A department that still has active doctors cannot be deleted.
- Room numbers are 2–20 characters of letters, digits and hyphens, and must be unique. Rooms are deactivated rather than deleted so past appointments keep their room.

7.5 Patients and ward status

- Search by **patient ID**, or by **appointment date** to list everyone with a visit that day.
- **Admit** marks a patient ADMITTED. This is only allowed while they have an appointment that has not finished.
- **Discharge** marks them DISCHARGED. Anyone still marked admitted whose last appointment has ended is discharged automatically the next time the list loads.
- Tick rows and press **Delete selected** for bulk removal. Deleting a patient also removes their appointment history — there is no undo.

Screenshot placeholder — patients tab with status column

8. Rules the system enforces

Rule	Where it applies	What happens if broken
A doctor cannot have two overlapping appointments	Booking and approval	The request is refused with a message naming the clash
A room cannot hold two overlapping appointments	Booking and approval	The request is refused; choose another room
Slots must fall inside the doctor's consulting hours	Booking	The slot is not offered
Mobile numbers are 10 digits starting 6–9	Registration, profile, doctor records	Saving is blocked with the rule shown
Passwords are 8–50 characters, mixed case, digit and symbol	Registration	Registration is blocked with the rule shown
Rejection remarks are mandatory	Approval queue	The rejection is not saved
Terms must be accepted before payment	Payment page	The Pay button stays disabled
Card numbers must pass a checksum	Payment page	Payment is refused before any charge
Departments with active doctors cannot be deleted	Admin console	Deletion is refused

9. FAQs and common error messages

Message or question	What it means and what to do
"Doctor already has an appointment in this time slot"	Somebody booked that slot first. The slot list refreshes — choose another time.
"Room C-102 is occupied in this time slot"	That room is busy. Leave the room blank and the front desk will assign one.
"Password and confirm password do not match"	Re-type both fields. Tick <i>Show passwords</i> to check.
"Mobile number must be exactly 10 digits and start with 6, 7, 8 or 9"	Enter the number without spaces, +91 or dashes.
"You must accept the terms and conditions before paying"	Tick I agree under the terms on the payment page.
"Card number failed the checksum test"	A digit is wrong. Re-enter the number exactly as printed on the card.
"Cannot reach the server. Is the backend running on port 8080?"	The API is not running or the network is blocked. Contact IT support.
"Please log in to continue"	Your session expired after 24 hours. Sign in again.
I cannot see my appointment	Check the Visited tab — appointments move there once the slot has passed.
Can I change an appointment time?	No. Cancel the appointment and book the new slot; any payment is refunded automatically.
My receipt looks different on my phone	Use Print / save as PDF rather than a screenshot; the printed copy is the official one.

10. Contact and support

Outpatient desk	08:00–20:00, Monday to Saturday · +91 22 4971 3052
Email	care@citycare.local
Address	104, 1st Floor, Sujata Chambers, Katha Bazaar, Masjid Station (W), Mumbai 400009
Portal or login problems	Contact the hospital IT team with your registered email and the exact message shown on screen.
Emergency	24×7 — attend the hospital directly. Do not use the portal for emergencies.

Appendix A — process flowcharts

The charts below cover the journeys described in this manual. The complete set of fifteen charts, including the administrative and technical flows, is in **artifacts/FlowchartPack.pdf** and as PNG and SVG files in **artifacts/flowcharts/**.
